Military working dogs, law enforcement K9's, and search & rescue dogs are often deployed on hazardous missions in which severe injury and trauma are a real danger. Chinook's K9 Kits include supplies to provide emergency medical care to a K9 casualty including treatment of gunshot wounds, penetrating wounds, lacerations, limb fractures and non-life threatening medical conditions. Designed in conjunction with K9 professionals, these kits should be standard equipment for every K9 team.

K9 Handler Medical Kit (TMK-K9H)

Includes the essential medical equipment needed to provide lifesaving care to an injured K9. The compact design allows for easy storage and transport. Packed in a rugged thigh mount bag to be worn by a handler.

K9 Handler Medical Module (TMM-K9)

This emergency medical module includes the same essential equipment provided in the K9 Handler but is packaged in a compact, vacuum packed, resealable bag for easy storage and transport.
